- The Financial Supervision Commission, Bulgaria, is responsible for supervising UniCredit Bulbank AD in relation to this Key Information Document.
- Production date of the KID: 16/09/2024

You are about to purchase a product that is not simple and may be difficult to understand.

## 1. WHAT IS THIS PRODUCT?

### TYPE

An Over the Counter (OTC) derivative contract – FX Vanilla Option (American-style)

### TERM

The product has a fixed contractually agreed term and will terminate after 2 years.

### OBJECTIVES

FX Vanilla Option (American-style) products are used for managing foreign currency risks.

An FX Vanilla Option (American-style) is an agreement between two contracting parties (client/UniCredit Bulbank AD) which gives the buyer of the FX Vanilla Option (American-style) the right but not the obligation to exchange an agreed amount of one currency for another currency at an agreed fixed rate on any future date prior to and including an agreed future date.

With the purchase of an FX Vanilla Option (American-style), you acquire the right but not the obligation to sell an amount of a specific currency (e.g. CZK notional amount) and buy an amount of another currency (e.g. EUR notional amount) at an agreed fixed rate (strike rate) on any future date prior to and including the agreed future date (settlement date). You may exercise your right at any time prior to and including an agreed date (expiry date).

In order to purchase this right, you will pay a non-refundable option premium.

Whether or not you exercise the FX Vanilla Option (American-style), you will not get back the option premium you paid.

Sample product terms are set out below and are based on legally predefined or realistic assumptions and may not match your specific contract details, e.g. your specific notional amount, your option premium, etc.

Currency pair	EUR/CZK
Option style	American - EUR Call / CZK Put
EUR notional amount	EUR 10,000.00
CZK notional amount	CZK 242,090.00
Strike rate	24.2090
Expiry date	16/09/2026
Settlement date	18/09/2026
Option premium	EUR 1,156
Option premium date	18/09/2024

## INTENDED RETAIL INVESTOR

This product is designed for retail investors who

- hold this product for the contractually agreed term,
- understand that the option premium paid is not refundable and that they may receive nothing or less than the amount of the option premium and
- have comprehensive knowledge of and/or past experience with OTC derivatives and the financial markets.

## 2. WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

### RISK INDICATOR

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class.

Be aware of currency risk. You may pay and/or receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

In some circumstances you may be required to make payments to pay for losses. The total loss you may incur may be significant.

This product does not include any protection from future market performance so you could incur significant losses.

If we are not able to pay you what is owed, you could incur significant losses.

## PERFORMANCE SCENARIOS

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period: Example notional amount: Scenarios		If you end after 1 year	2 years EUR 10,000 If you end after 2 years
<b>Minimum scenario</b>	There is no minimum guaranteed return. You could lose some or all of your premium.		
<b>Stress scenario</b>	What you might get back or pay after costs	EUR -1,321	EUR -1,156
	Average return/loss over notional amount each year	-13.2%	-5.8%
<b>Unfavourable scenario</b>	What you might get back or pay after costs	EUR -1,235	EUR -1,156
	Average return/loss over notional amount each year	-12.3%	-5.8%
<b>Moderate scenario</b>	What you might get back or pay after costs	EUR -845	EUR -790
	Average return/loss over notional amount each year	-8.5%	-4.0%
<b>Favourable scenario</b>	What you might get back or pay after costs	EUR -275	EUR 75
	Average return/loss over notional amount each year	-2.8%	0.4%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back or pay.

The favourable, moderate, unfavourable and stress scenarios represent possible outcomes, which have been calculated based on simulations using the past performance of the currency pair over the past 5 years. The stress scenario shows what you might get back or pay in extreme market circumstances.

This product cannot be easily cashed in. This means it is difficult to estimate how much you would get back if you cash in before the end of the recommended holding period. You will either be unable to cash in early or you will make a large loss if you do so.

### 3. WHAT HAPPENS IF UNICREDIT BULBANK AD IS UNABLE TO PAY OUT?

Counterparties of derivative transactions are exposed to the risk that UniCredit Bulbank AD becomes unable to discharge its obligations under the transaction, for example in the case of an insolvency (inability to pay or overindebtedness) or in the case resolution measures are taken by an authority against the credit institution. Such a decision to take resolution measures can, for example, be taken if the assets of the institution are less than its liabilities, where it is unable or will, in the near future, be unable to pay its debts or other liabilities as they fall due, or where it requires extraordinary public financial support. Where resolution measures are taken, the competent resolution authority can decide on an early termination of the derivative transaction. In the case such early termination results in a claim of the counterparty against the credit institution, the decision of the resolution authority can lead to a partial or complete reduction of the principal amount of this claim or in a conversion of this claim in to equity (shares or other types of equity).

If UniCredit Bulbank AD does not fulfil its obligations connected with the product or is unable to pay, you can lose part of or the full payout or can suffer an unlimited loss. This product is not protected by any deposit guarantee scheme, legal or otherwise, or any other type of guarantee.

### 4. WHAT ARE THE COSTS?

The person selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

#### COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount

and different possible investment periods.

We have assumed:

- The product performs as shown in the moderate scenario.
- A notional amount of EUR 10,000

	<b>If you end after 1 year</b>	<b>If you end after 2 years</b>
<b>Total costs</b>	EUR 815	EUR 650
<b>Annual cost impact (*)</b>	8.2%	3.3%

(\*) This illustrates how costs reduce your return in relation to the notional amount each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be -0.7% before costs and -4.0% after costs.

## COMPOSITION OF COSTS

<b>One-off costs upon entry or exit</b>		<b>If you end after 1 year</b>
<b>Entry costs</b>	These costs are already included in the price you pay.	Up to EUR 650
<b>Exit costs</b>	These costs only apply if you exit before maturity (end of the agreed term).	EUR 165

## 5. HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

### Recommended holding period: 2 years

The recommended holding period corresponds to the contractually agreed term. You are not entitled to unilaterally terminate the product prematurely. However, the right of early termination may be agreed for one or both contracting parties. In the event of an agreed early termination, you will either receive or pay a compensation payment, which is made up of the market value of the product and the termination costs, including a margin earned by the bank. Significant additional costs may be incurred.

## 6. HOW CAN I COMPLAIN?

You can make complaints about the product, or about the behaviour of the issuer of the product or of the persons who sell the product, on the following website <https://www.unicreditbulbank.bg/en/corporate-clients/financial-markets/financial-markets-and-services>, in writing to UniCredit Bulbank AD, Corporate Treasury Sales, 7 Sveta Nedelya Sq., 1000 Sofia, Bulgaria or via e-mail to [CorporateTreasurySales@UniCreditGroup.Bg](mailto:CorporateTreasurySales@UniCreditGroup.Bg).

## 7. OTHER RELEVANT INFORMATION

Additional product information is available on request. UniCredit Bulbank AD reviews this Key Information Document annually. The latest version of the document is available for you under <https://www.unicreditbulbank.bg/en/corporate-clients/financial-markets/financial-markets-and-services>.
